Sogan, LLC

CASCADE ASSET MANAGEMENT

6701 Manufacturers Dr • Madison, WI

Highlights

We developed and newly constructed an office and warehouse to facilitate environmentally responsible IT asset retirement, reverse logistics, disassembly, recover, refurbishing and recycling for Cascade Asset Management.

The construction type of precast panels with a flat ballasted roof and internal storm water drainage made for a sleek exterior. Manufacturing to office ration is close to the same and space-saving mezzanine architecture is used for storage and future office space.

Jason Bollig – Executive Vice President

“This was a 30,000 ft² building including 5,000 ft² of finished office space. Despite the immense size of the project, we were able to complete construction in just four months.”
